

Feedback Form

This questionnaire aims to collect your perceptions regarding the use of the *RiskGuard* game as a teaching and learning approach for security patterns and software vulnerabilities in web systems, as well as suggestions for improvement.

Therefore, please answer the following questions based on the teaching and learning activity in which you participated.

What is your full name? *(Required)*

The requested information is necessary so that your responses across different questionnaires can be analyzed together. However, we emphasize that your confidentiality, anonymity, and privacy will be fully preserved throughout the entire research.

Feedback Questions

1. How satisfied were you with the *RiskGuard* game as a learning tool for security patterns and software vulnerabilities? *(Required)*

2. Did the game maintain your interest and encourage your participation in the learning process? *(Required)*

3. In your opinion, can the concepts learned in the game be applied to real-world scenarios? *(Required)*

4. Did you find the *RiskGuard* serious game complex to use? *(Required)*

5. Would a digital version be more appropriate than the version used? *(Required)*

6. Which aspects would you change in *RiskGuard*, and why? *(Required)*
